

## AquaSmarter 'Water Purification' System for Water Storage Tanks

## AquaSmarter 'Water Purification' System for In-Ground Potable Water Wells

### Summary

The AquaSmarter/AquaSmarter Potable Water Well System performs at maximum efficiency, when all the data collection is accurate and conducted by a Certified or credible laboratory. We, at AquaSmarter/AquaSmarter require the results to be accurate in-order for us to design and build the AquaSmarter/AquaSmarter System according to each individual installation. The AquaSmarter/AquaSmarter System has been proven to be successful at eliminating Bacteria, Viruses, Dust Particles, Heavy Metals, and deliver a quality of water that people have never experienced before. We have been cleaning water for people to drink for the past seven years. AquaSmarter/AquaSmarter System does not remove Chemicals. In these cases we can work in conjunction with a Carbon Filtration System to remove the chemical before the AquaSmarter/AquaSmarter System ionizes the water. The AquaSmarter/AquaSmarter Ionization Systems can be used in conjunction and provide a synergistic solution with other methods of sanitation including, chlorine, ozone ultraviolet and chemical systems for improved performance as a supplemental or dual stage method of sanitation.

The AquaSmarter/AquaSmarter System is the only system on the market today that can offer the cleaning and Conditioning of water with a residual life span of one year without the use of chemicals. The AquaSmarter/AquaSmarter System will reduce the costs of cleaning and treating water in almost every category. The AquaSmarter/AquaSmarter Team is a World Class Operation with a 7-Year Proven Technology. Satisfaction and Quality are our Highest Priority in order to design and build a Water Conditioning Solution for almost any water related problem from inception to completion.

For Verification that our AquaSmarter H2O-System has been Tested, "Safe for Human Consumption", please refer to our EPA Est. Number (EPA Est Number: 075702-CRI-00) as well as our 6-year History with Flamingo Beach Community of Purified 'AquaSmarter' Water every day (<http://AquaSmarter.net/WaterC>)
